

# INTERNATIONAL PHARMACOPOEIA (Ph. Int.)

**Publisher:** WHO

## Overview

This online version of the International Pharmacopoeia provides monographs for pharmaceutical substances, including active ingredients, excipients, and dosage forms. It outlines recommended analysis procedures and specifications to unify standards globally, supporting international trade and ensuring safety in supplements and medicines.

The pharmacopeia includes detailed monographs covering Active Pharmaceutical Ingredients (API), solubility, chemical names, identity tests, impurities, and assays. Manufacturers can access this information under the "Monographs" >> "Pharmaceutical Substances" tab, where ingredients can be searched by English or Latin titles.
