

QUALITY ASSURANCE OF PHARMACEUTICALS

A COMPENDIUM OF GUIDELINES AND RELATED MATERIALS

Publisher: WHO

Overview

The linked documents provide essential guidance on ensuring the safety, efficacy, and quality of medical products. They cover the full product lifecycle, from development and manufacturing to post-marketing surveillance, offering a comprehensive framework for quality assurance. The latest edition reflects input from global experts and stakeholders, equipping industry professionals with the tools needed to prioritize patient safety and well-being.

These resources also emphasize the critical role of Good Manufacturing Practices (GMP) in preventing adverse effects and ensuring high-quality products. The documents serve as a valuable reference for manufacturers, regulators, and other stakeholders, addressing topics such as quality management, hygiene, validation, and complaint handling, all based on the most up-to-date scientific and technical knowledge.
