

PRODUCT PREPARATION INSTRUCTIONS F75, F100

Location: Requirements and Standards Sensory Guidance

Alternate Name: Safe preparation of therapeutic milk F75 and F100

Date Document Last Updated: 2023

Publisher: UNICEF

Date Uploaded to Website: January 2025

Overview

These guidance videos illustrate proper preparation instructions for therapeutic milk formulas F75 and F100 for children with Severe Acute Malnutrition (SAM). There are also instructions for preparing diluted F100 for inpatient treatment of children with Malnutrition. It is important to make these products correctly to reduce the risk of hypernatremia, and reduce renal solute load. The videos are available in English, French, Arabic and Somali, and provide some visual sensory guidance on how to follow the instructions on label and how the product should look when made properly.

Overall, these videos will ensure the proper preparation of these important products.
