Overview

This document is a specification sheet for a product used for nutritional fortification for making therapeutic foods in the dietetic treatment of severe acute malnutrition. This product must only be used in the treatment of Severe Acute Malnutrition, under medical supervision.

The document outlines the instructions for product use, target population, technical specifications including the formulation and raw materials of the formula such as milk, the international standards, processing requirements, food safety and hygiene criteria, risk assessment at manufacturing premises, analytical requirements, and specific packaging and labeling details. Information regarding proper product storage, shelf life and stability are also included.

Overall, this document provides information on the intended use, specification, acceptable limits and processing methods for CMV. This document can be used by suppliers and manufacturers to ensure their product meets the indicated specifications for CMV.
