

EUROPEAN PHARMACOPOEIA: KNOWLEDGE DATABASE

Publisher: European Directorate for the Quality of Medicines & HealthCare (EDQM)

Overview

This European online database allows users to access information on specific substances or general analytical methods. It includes details such as the monograph number, titles in English, French, and Latin, the status of the work, the last issue of the *Pharmeuropoea* featuring the monograph draft, the latest European Pharmacopoeia publication, whether the monograph is under revision, chromatograms in PDF format, and trade names for reagents like chromatography columns and biological kits.

This database is a tool for identifying ingredients that comply with this pharmacopeia.

To begin a search, select a language and enter the substance's name in the search bar. For multiple micronutrient supplement ingredients, use the scientific name to retrieve relevant information.
