

WHO GUIDELINES: NORMS AND STANDARDS FOR PHARMACEUTICALS

Publisher: WHO

Overview

For those seeking authoritative guidance on pharmaceutical standards, the World Health Organization (WHO) provides a comprehensive collection of guidelines that ensure the quality, safety, and efficacy of health products. These guidelines serve as a global reference, supporting regulatory frameworks, manufacturing practices, and public health initiatives.

The below web page links to the current **WHO norms and standards for pharmaceutical guidelines**, systematically grouped into key areas: (1) development, (2) production, (3) distribution, (4) inspection, (5) quality control, (6) regulatory standards, and (7) specific texts for the prequalification of medicines.

On the site you can also find specific guidelines that are Working Documents in Public Consultation.
