

POINTS TO CONSIDER FOR MANAGING SALMONELLA INCIDENTS

Document Location: Process Control - Incident Management and Lessons Learned

Alternate Name: Presentation at 2023 Supply Forum by Tejas Phatak - Technical Director, Soma Nutrition Labs

Date Document Last Updated: November 2, 2023

Publisher: Soma Nutrition Labs

Date Uploaded to Website: June 8, 2024

Overview

The presentation by Soma Nutrition Labs is a 'lessons learned' and presents the key points to consider for investigating and managing *Salmonella* cases in RUTF. The presentation details approaches for investigating *Salmonella* incidents and highlights the need for efficient change-control management, efficient in-house *Salmonella* detection capabilities, higher sampling frequencies for high risk raw materials, and advanced equipment to neutralize threats from external water sources are all important considerations.

This presentation should be useful for suppliers looking for information on how other businesses have managed salmonella outbreaks and provides insights to consider when creating preventative control plans.
