

PRODUCT SPECIFICATION SHEET LNS-MQ LIPID NUT. SUPPL. MED 50g/CAR-300 (S0000324)

Document Location: Requirements and Specifications - UNICEF Specifications

Alternate Name: Material No: S0000324

Date Document last updated: 2022

Publisher: UNICEF

Date Uploaded to Website: June 2, 2024

Overview

This document is a specification sheet that discusses the intended use of LNS-MQ Lipid Nut. Suppl. Med 50g/CAR-300, a medium quantity Lipid-based Nutrient Supplement (LNS-SQ) paste that is intended for the use of dietary management for children 6 months and older with acute malnutrition.

The document outlines instructions for product use, physical properties, nutrient content, technical specifications, the product composition, their processing methods, packaging and acceptable microbial limits. The document also outlines analytical testing requirements and lists useful resources that can be referenced. A number of Codex documents are referenced throughout the specification sheet. Labeling and packaging instructions are also provided.

The specification sheet also addresses that LNS premixes must be supplied only from suitably qualified premix facilities. A site containing a list of credible premix suppliers is provided, however, suppliers must also validate their premix with UNICEF to ensure quality and compliance to standards. Table 1 of this document provides an example of premix composition that manufacturers can reference.

Overall, this document provides information regarding the intended use, specification, acceptable limits and processing methods for LNS-MQ Lipid Nut. Suppl. Med 50g/CAR-300. This document can be used by suppliers and manufacturers to ensure their product meets the indicated specifications.
