

UNITED STATES PHARMACOPOEIA (USP)

Publisher: USP

Overview

USP is an independent scientific non-profit that partners with leading health and science experts to develop quality standards for medicines, supplements, and food ingredients. It collaborates with academia, industry, and regulators to adopt advanced manufacturing technologies and expand global access to quality medicines, supplements and foods products. For more info, visit www.usp.org.

The USP-NF is a globally recognized compendium of quality standards that provide a benchmark for evaluating the quality of medicines. Published by the USP, it provides authoritative monographs and guidelines to ensure the identity, strength, quality, and purity of substances used in healthcare.

The USP-NF includes detailed monographs for Active Pharmaceutical Ingredients (APIs), excipients, and dosage forms relevant to Multiple Micronutrient Supplements (MMS). These standards support manufacturers in meeting regulatory requirements and ensuring product safety and consistency. The USP-NF also provides a detailed monograph for **Oil- and Water-Soluble Vitamins with Minerals Tablets**, which is applicable as a Finished Pharmaceutical Product (FPP) reference for UNIMMAP-MMS. You can access the monograph using the below link or by contacting the USP team at USPverified@usp.org.
