

MMS 90 TABLET BOTTLE (S1580103)

Publisher: UNICEF

Overview

The linked document outlines the specifications for a bottle of 90 Multiple Micronutrient Supplement (MMS) tablets designed for pregnant and breastfeeding women, based on the WHO & UNICEF UNIMMAP formulation and aligned with WHO antenatal care guidelines.

This specification provides the technical, quality, and regulatory requirements for the product to be procured by UNICEF, ensuring that it is safe, effective, and fit for its intended use in programme settings. It defines the expected composition, manufacturing standards, packaging, labelling, and quality assurance criteria, aligned with internationally recognized guidelines and UNICEF supply policies. By establishing these requirements, the document supports consistent product quality, facilitates supplier compliance, and enables efficient procurement and delivery of essential supplies to target populations.
